

HOW TO EXPLORE

MORNING WALK

Enjoy the magnificent birdlife on a morning walk in Nerang National Park. Explore quiet areas and creeks just after dawn for your best chance of seeing some stunning birdlife.

HALF-DAY TREK

Utilise any Park entrance and trek to the summit along Centre Road for unexpected views of the Gold Coast and hinterland.

BY NIGHT

Frogs, gliders, owls, and even pink-tongued skinks can be found after dark. Remember to use a red light torch (or regular torch with cellophane) when searching for owls and mammals.

NATURALLY UNIQUE

Functioning as the lungs of the Gold Coast, Nerang National Park is a leafy oasis in the central Gold Coast. Home to over 15 threatened species, this important patch of bushland even includes a section of critically endangered rainforest.
